

# Perigord

**General:** Designed both for traditional environments and for modern and essential spaces, The Perigord series encompasses all the charm of the stone of the same name coming from the French region of Perigord. The soft matt finish gives this material elegance and class; delicate marks on the surface recall the appearance of the stone that has been softened by the passing of time.

**Applications:** Commercial & residential indoors, including offices, foyers, galleries, living areas, bathroom, kitchen floors and walls.
