

# Pietratech

**General:** The ideal product for those who love the subtle textured flamed surfaces of natural stone. Pietratech is characterized by a particular "bright" effect, obtained from the presence of light- reflecting mineral particles, an exclusive feature of this material. This series allows for infinite laying solutions and is destined to become favourite of the essential and minimalist design. Pietratech is perfect for the most refined & exclusive environments.

**Applications:** Commercial & residential in and out doors, including foyers, shopping centres, courtyards, living areas, patios, bathrooms, walls inside & out, step treads and pool surrounds (with lamination and various edge detail finishes being achieved)
