HARD SURFACE SOLUTIONS

## Product Feature

### Liston Gres - Marine

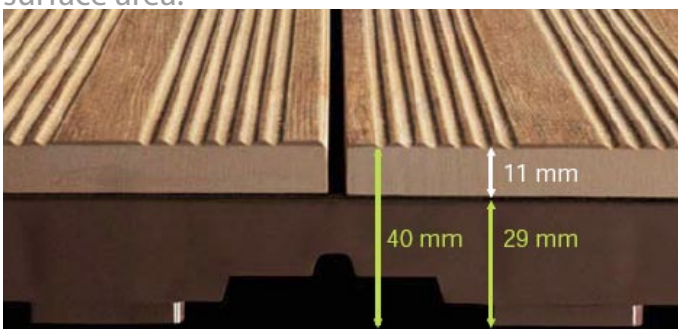

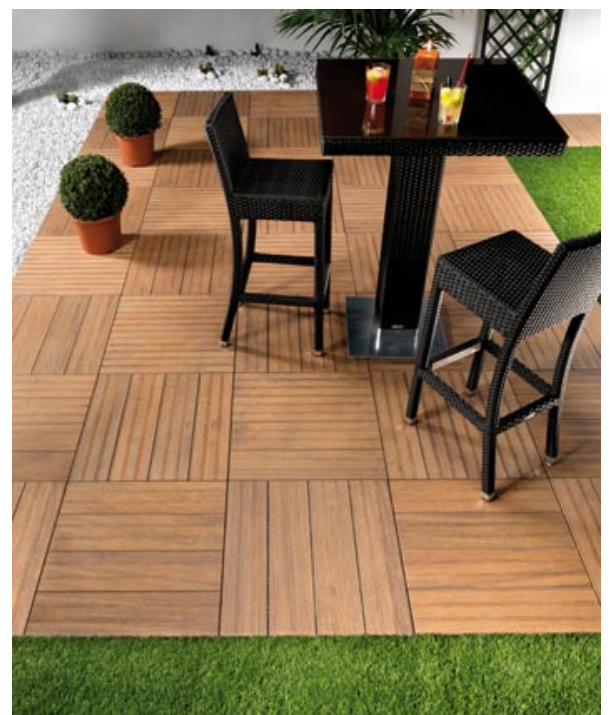

This innovative porcelain offers the warm & natural shades of wood, re-inventing the outdoors and wet area environments.

A new 'Crossjet' technology allows for precision on the whole structure of the tile, from groove to the edge. Thanks to the excellent technical qualities of this material and the versatile Module proposal, Marine is ideal for commercial applications with wet zones, and will remain unchanged in time.

The Module proposal consists of 4 marine tiles pre-glued to a hardened plastic substrate, with gaps for water drainage and an interlocking system that allows for simple installation.

Application ideas include commercial & residential wet areas, pedestrian walkways, swimming pool surrounds, showers, spas, saunas, bathrooms, dressing rooms, balconies & patios, public facilities etc.

The module system is ideal for renovating by simply laying & interlocking the pre-formed substrates together over any existing solid surface area.

HARD SURFACE SOLUTIONS

## Product Feature

### Urban Life

Urban Life is a nature-inspired collection of body textured porcelain tiles imported from Italy, in 4 different colour schemes, 3 surface finishes and 4 modular sizes.

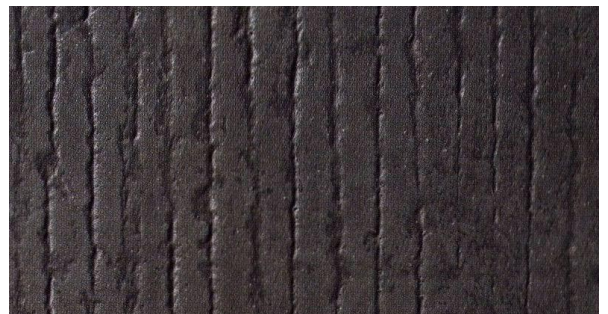

Created by forging and extruding hardening ceramic matter with slow cooking temperatures up to 1,250 degrees Celsius, this resistant material can be used as both tile and paver.

To be commercially viable, pavers and tiles need to withstand impact from cars, trolleys, pedestrians and weather, and provide a maintenance free surface with the right aesthetic.

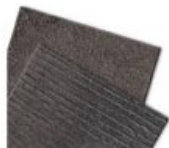

Offering low water absorption, frost resistance, UV ray resistance, chemical resistance and a high surface hardness, these hard wearing qualities of Urban Life textured porcelain tiles make them well-suited to use in most commercial & residential settings.

Urban Life comes in a raw, bush-hammered or raw, ribbed finish for outdoor use, or a honed ribbed finish that can be used indoors and outdoors.

Suitable for shopping centres, foyers, public areas and walkways, cafes, courtyards, driveways, pool surrounds, patios and living areas.
