HARD SURFACE SOLUTIONS

## Product Feature

### Kerlite Plus - New Series

Rocks On welcomes two new series to the Kerlite Plus range - Geoquartz and Black&White. Kerlite Plus is a 3.5mm thick porcelain material with fibre glass backing that can be easily installed directly over existing flooring in wood, ceramic or any other compact type of surface. Architects and Decorators can create what ever design proposals they desire from this unique material with application ideas including – commercial & residential indoor floors, including foyers, galleries, living areas & all wall applications like kitchen & bathroom splashbacks, lift cars and external walls (inclusive of wall cladding).

### Geoquartz

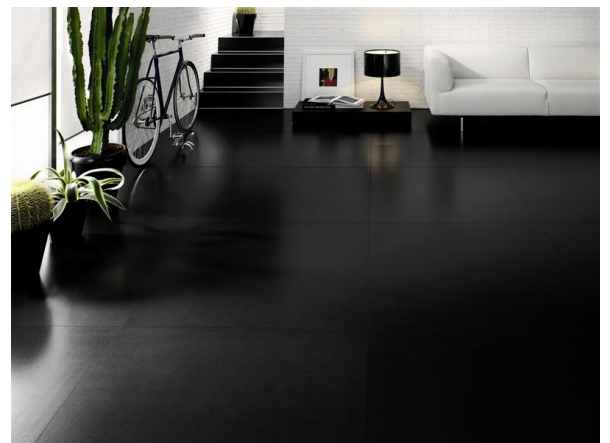

Geoquartz recalls the beauty of sandstone and its rich content of quartz. This new addition to the Kerlite family is decorated using the latest in inkjet technology to offer slabs that are uniquely different and feature incomparable effects. Geoquartz has an R11 sliprating, a sand-blasted, matt surface and is produced in large sizes ideal for a wide range of applications including wall facades.

### Black & White

White and Black. Light and Dark. Empty and Full. Primordial, pure, essential elements, perpetuously alternating. Harmonic tension, pulsing rhythm. The rhythm of those who do not fear contrasts, of those who travel lightly and rapidly towards their destination. Black & White adds two strong and defining colours to the Kerlite series in a semi glazed, smooth surfaced feel.

## Product Feature

### Palmyra

One of the most beautiful sedimentary rocks, hidden beneath desert sand, has been unearthed to tell its timeless story of ancient civilisations. Palmyra, gem of the desert of Syria. An original porcelain stoneware collection obtained using soluble salts that have been coloured with the latest inkjet technology, are available in three warm colours:

**Assyria**, with its luminous beige colour, **Zenobia**, with its nut-brown colour featuring sepia shades and **Shamin**, with an ash grey colour. Palmyra is also the first series to be produced with Microban® technology.

Suitable for all commercial & residential indoors, including offices, foyers, galleries, living areas, bathroom, kitchen floors and walls.

### Microban Technology

Microban®, the global leader in antibacterial technology has teamed up with Cotto d'Este to offer something more than just beautiful porcelain tiles.

Tiles produced with Microban® technology are protected by an innovative antibacterial shield that eliminates up to 99.9% of bacteria on surfaces and guarantees long-lasting protection against wear and tear, climatic conditions and repeated cleaning in any environment.

In addition, Microban® technology is active 24 hours a day, guaranteeing continuous protection against bacteria day & night, keeping tiles more hygienic in between cleans.

Currently, Palmyra is the first series being produced with Microban® technology, with further series incorporating Microban® in the future. Microban® protection can be incorporated into any of the Cotto d'Este series of tiles and laminates\*
