Elegance Series - New Colour 'Farini'

Elegance - 'Farini' colour shown above

Elegance says it all! This beautiful series of porcelain stoneware is the re-creation of the finest hand selected limestones that have been carefully honed & polished. This is obtained by the use of soluble coloured salts, which penetrate into the tile body, then machine finishing the surface to create an elegant feel. Elegance looks stunning in both classical and modern interiors. The introduction of the new colour 'Farini' adds warmth to the range. Elegance is ideal for a wide range of applications including commercial indoors & residential in & out doors, foyers, boutiques, living areas, balconies, kitchens, bathrooms, walls and step treads.

Kerlite Plus - New Colour 'Farini'

The Elegance 'Farini' colour is also available in the Kerlite Plus range – a 3.5mm thick porcelain material with fibre glass backing that can be easily installed directly over existing flooring in wood, ceramic or any other compact type of surface. Architects and Decorators can create what ever design proposals they desire from this unique material with application ideas including – commercial & residential indoor floors, including foyers, galleries, living areas & all wall applications like kitchen & bathroom splashbacks, lift cars and external walls (inclusive of wall cladding).

The 'Farini' colour in Kerlite Plus recreates the look of light tobacco coloured limestone and is a true innovation in the building industry - available in sizes up to 1000 x 3000 x 3.5mm.
