

Veneziantica Terrazzo

General: At last the finest quality Venetian Terrazzo can be quickly laid anywhere in the world, without the need to import a team of Italian artisans – when using 600x600mm Veneziantica tiles & decors.
The Cancian family have been masters of Terrazzo since 1840, and this noble tradition of craftsmanship has been passed on down from father to son until today. While the expert techniques remain unchanged, the scale of the company has grown to meet the demands of International expectations and requirements – including new and innovative solutions that unite tradition with modern laying techniques. There are countless combinations of design within the Veneziantica Terrazzo tile series, with the highest quality marbles and raw ingredients combined to deliver the beauty and tradition of the best hand made Italian terrazzo.

Applications: Commercial & residential in & out doors, including commercial high traffic areas - hotels, restaurants, showrooms, galleries, boutiques, living & entertaining areas.

Creative: Veneziantica allows you create any design you like using the many different colours and combinations in base, fascia and moulding tiles as described above. This means you can personalise your work to meet a specific design requirement. It is also possible to produce individual colours and decors specially created and designed for unique projects.
